

INTRODUCTION

NgT is a creative agency, with innovative ideas for the NFT sector.

Structured like a classic advertising agency, it aims to become a reference in the world of crypto. It aims to meet all of its customers' needs. Thanks to our NftSECURE® system, we are able to generate a digital certificate of authenticity. Subsequently, we create an artistic object linked to the object which brings financial added value to the products and the brand.

OUR TEAM

Our project is a partnership of three founders from the world of art and each wanting to bring a new vision to the luxury brand industry using a modern innovative approach all three with their personal and professional experiences:

Jonas Afariat, who following his many years of experience in renowned agencies, has developed his sensitivity and knowledge in the world of BlockChain. He is the President, the creative director and he is at the origin of this adventure.

Lucas Campbell, with his experience in financial consulting firms and his artistic background, has an overall vision of the project. He is the "But" when Jonas and Ahmed are the "And". He is the General and Commercial Director.

Ahmed Ben Jaber, after several years as a freelance in photography and artistic direction, has forged a reputation in the industry and brings his vision and analysis to the project. He is the third co-Founder and Artistic Director.

OUR PROJECT

PRINCIPE

YOUR NFT

It is the reproduction of the object you have just acquired, its virtual double. The NFT, thanks to the Blockchain, allows the tracking, certification and warranty of your object. It accompanies the classic certificate of authenticity and in addition brings your object a general added value.

YOUR PURCHASE

As soon as it is purchased in the store, your object is linked to its exclusive NFT. They become one. Any action on one affects the other. This allows traceability and product history. Your object now has double life and a double value.

SERVICE I LUXURY PRODUCTS CERTIFIED AND AUTHENTICATED DIRECTLY BY THEIR CREATORS OUR APP

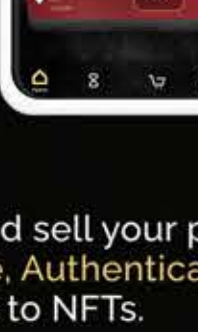

Purchasing your product in store:

The first step is the acquisition of your product in store with a classic process of buying luxury goods.

Scan of the QR code on the certificate of authenticity or the receipt

After purchasing your product and therefore the NFT that accompanies it, you have at your disposal either on a card, a receipt or on the certificate itself, a QR code that you must scan to access our application.

App download

After scanning your QR code, all you have to do is download the application by following the protocol indicated in order to have access to your newly created NFT.

Buy and sell

You are now registered on our platform and you have your exclusive NFT in front of you. You can now visit all the other functionalities of our application. In particular our marketplace where you can sell your product and its NFT but also buy the NFTs of the different sellers and thus acquire the products linked to them.

NFT

Présente sont application **NFTSECURE**.

Find on our application, all the NFTs of the biggest luxury brands linked to their physical equivalents. Thanks to its different options you can collect, buy and sell the NFTs you like.

Buy and sell your products Secure, Authenticated & Certified thanks to NFTs.

SECURITY

Security is one of the pillars of our project. To guarantee our users and our partners an optimal experience, we have implemented a security system on our application that ensures the proper functioning of all NFT exchanges.

Our team is available at any time on the info service and is responsible for answering all the questions you have and all the problems you may encounter.

BENEFITS

For app users:

- Thanks to our application, exchange, buy and sell your NFTs safely.
- Enjoy access to all the information of your NFT and all its particularities.
- Collect exclusive NFTs
- Enjoy early access to all product roundups for the chance to own a rare product.

For our customers:

- You are supported in this new market.
- Your products have a double life.
- Enjoy extra security
- Enjoy a continuous source of income
- Take advantage of powerful commercial prospecting tools thanks to the blockchain.

SERVICE II COLLECTIBLES CERTIFIED AND AUTHENTICATED BY PROFESSIONALS.

Purchase of the object in the auction room :

When customers acquire their products in the auction room, they receive their NFT certificates in the form of a metal card engraved with a QR code.

Scan of the QR code on the metal card :

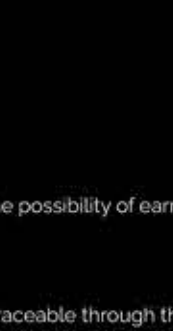

Customers scan the QR Code and are redirected to a web page to create their Wallet or connect to their existing wallet to retrieve their NFT.

Buy and Sell

The customer is now registered on a marketplace, he can keep his NFT there but also sell and buy other products.

OUR QR CODE

How it works ?

This is what the "NgT Cards" and their QR Codes will look like. They are engraved and loaded with the NFT relating to the object. Each card is unique and engraved with the serial number corresponding to the date of sale, certificates of authenticity issued by the auctioneer and the number of the NFT.

THE NFT RELATED TO THE OBJECT

What will it look like?

The NFT automatically becomes the equivalent of the certificate of authenticity. It can take the form of the object in question, a digital document listing all the characteristics of the product (its creation date, its creator, its date of sale, its owner, the places and the auction room, etc.) or of a graphic work in its own right.

ADVANTAGES

For you :

Thanks to this system, you have the possibility of earning a commission for each NFT transaction.

- Your products are certified and traceable through the blockchain.
- You and your customers are supported in this new market.
- The products sold will have a double life.
- It is an additional guarantee of security.

For our Users :

- You will be accompanied in this new market.
- It is an insurance for your acquisitions.
- You benefit from a dematerialization of the certificate of authenticity.
- You benefit from added value to your objects.

TOKEN ECONOMICS

ROADMAP

Q4 2021 After a year of watching the NFT's market and creating collections, our desire to organize our project is born. We imagine a way to support the major luxury brands in this new sector.	T1 2022 We start creating and designing our application. We study the different technical aspects and integrate an external consultant specialized in smart-contracts as well as architecture.	T1 2022 The beginning of the NgT and NftSECURE's adventure. We establish the foundations and the structure of our idea that we matured all the previous year. We're building our team, and beginning to define our project and its potential over time.	Q2 2022 Our version 1.1 of the NftSECURE application has been completed. We are considering our first ICO.
Q2 2022 After our pré sale we are starting a first phase of Tech recruitment to join us on the development of our application. In the same time, we invest in the communication and promotion of our project to reach our target.	Q3 2022 We begin the implementation of the architecture, the programming of the app, the software, and the website. We study the development of smart contracts as well as the management of wallets.	Q4 2022 We technically validate smart contracts. A phase of stress-test and proof of concept are launched on all of our programs. The application is functional, the different modules are connected and linked. Setting up the private sale.	Q1 2023 Official launch of the beta version of our application, functional and innovative. Launch of the Private sale. It will help us to hire other technical partners, and will allow us to meet our future customers.

OUR TOKEN

Blockchain used : The NgT Token is attached to the Binance Smart Chain BP20, a choice of stability, security and reduced FEES.

Utility : Our Token is the currency of our application. Buying our Token gives you access to advantages when acquiring an NFT on our platform.

Benefits : Holders of our Tokens will have access to the exclusive Drop of our collections.

Stacking the maximum Token will allow you to be among the first privileged to obtain an exclusive NFT. Using our Tokens will allow you to reduce your blockchain transaction fees.
